PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack web development, REST API development, authentication, database management, and secure web applications. Skilled in Java, React.js, Node.js, Express.js, MongoDB, and SQL, with strong knowledge of OOP, DBMS, Data Structures and Algorithms, and problem-solving. Experienced in developing and implementing real-world software projects with a focus on scalable and reliable solutions.

EDUCATION

G.L.A. University

Bachelor of Technology in Computer Science and Engineering

Anglo Vedic Sr. Sec. School

Higher Secondary Education

Mathura, Uttar Pradesh

2023 – 2027

Bahjoi, Uttar Pradesh

SKILLS

- **Languages:** Java, JavaScript, SQL
- **Frontend:** React.js, HTML5, CSS3, Responsive Web Design
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL,
- **Tools:** Git, GitHub, VS Code, Postman
- **Core Concepts:** OOP, DBMS, Data Structures & Algorithms
- **Problem Solving:** Solved 150+ DSA problems on LeetCode

PROJECTS

- **Hospital Management System** (GitHub) (Live Demo)
 - Developed a full-stack Hospital Management System with role-based access for Admin, Doctor, Receptionist, Patient, Pharmacist, and Lab Technician modules.
 - Implemented secure JWT-based authentication using access and refresh tokens, HttpOnly cookies, bcrypt password hashing, and route-level role-based authorization.
 - Designed scalable MongoDB data models using Mongoose for patients, doctors, appointments, pharmacy, laboratory, billing, and medical workflows, including database constraints to prevent appointment conflicts.
 - Built healthcare workflows for patient management, appointment scheduling, pharmacy dispensing, laboratory reporting, billing, PDF invoice generation, and administrative audit logging.
- **Smart Attendance System** (GitHub) (Live Demo)
 - Developed a full-stack attendance management system using React.js and ASP.NET Core for real-time attendance tracking and management.
 - Implemented JWT-based authentication and role-based access control for Admin, Employee, and Student modules.
 - Built RESTful APIs and integrated MongoDB for attendance management, user data, and reporting functionalities.
 - Integrated face recognition and webcam-based attendance verification using Face API libraries for automated attendance marking.
 - Designed responsive dashboards and analytics interfaces to monitor attendance records, trends, and user activity.

CERTIFICATIONS

- **DevOps and Cloud Computing – Summer Training**
GLA University (Coding Blocks)
- Learned fundamentals of CI/CD pipelines, Jenkins, Git, and AWS cloud deployment concepts
- Applied DevOps concepts by building and deploying CI/CD pipeline projects

ACHIEVEMENTS

- Solved 150+ DSA problems on LeetCode covering arrays, strings, recursion, sorting, and searching concepts
- Built academic projects focused on full-stack web development and secure web application workflows
- Actively practice problem-solving and explore modern software development technologies
